DEPARTMENT OF COMPUTER APPLICATIONS

Experiential Learning Report – December 2021 - March 2022

A successful software project during the final year of Master Of Computer Applications education is important. This is because, questions about the project during an interview is common . Impressing the employer with a high quality project is the best way to get a job. So students are advised to Choose a project topic for which job potential is high and which can land them a job in companies. Doing a project in which they develop a complete software application for a domain of their choice will help them in their career.

The following is the list of final year M.C.A. (2020– 2022 Batch)students who had their experience in the various process of Software Development by undergoing their Academic Projects during their Final Semester in the various software organization mentioned against their names.

Experimental Learning Report

Experimental Learning courses give students an opportunity to apply what they have learned in their core courses on real-world projects. Students of Department of Computer Applications undergo Experimental Learning during their lab hours for their Practical papers.

The above photo is the evidence of III BCA Boys (U19CA2001-U19CA2055) undergoing “**Programming in PHP – Practical**” – **U6R1CACC14P** on **14.12.2021** for three hours in our MCA Old LAB. PHP(short for Hypertext PreProcessor) is the most widely used open source and general purpose server side scripting language used mainly in web development to create dynamic websites and applications. PHP can receive data from forms, generate dynamic page content, can work with databases, create sessions, send and receive cookies, send emails etc. So our Professors encourage the students to practically learn it and use it for developing projects and succeed.

The List of students who attended the session is given below:
